Comments: Dear AEMC,

In section 4.3 you propose to "give the keys" to the Energy Companies by enabling them to decide when ,where and how much they may manipulate a standing offer to purchase excess solar feed in pricing.

This is a severe conflict of interest as any number of Energy Companies also market home solar systems pitched as saving the consumer but also helping save the environment.

Also given that Victoria is closing down 22% of their generation not too far away ,this is a retrograde step.
